Product Designer

Copenhagen, Denmark | natalicetre@gmail.com | linkedin.com/in/nataly-cetre-b93618158 | behance.net/natalicetr5d99

SUMMARY

Product designer with 9 years in design, the last 5+ years focused on product and UX. I combine a graphic design foundation (visual craft, typography, motion) with research, systems thinking, and interaction design. Currently shaping loyalty and engagement experiences for brands across Denmark at MyLoyal.

EXPERIENCE

Product Designer

Mar 2022 - Present

MyLoyal, Copenhagen

- Designed a magic-link invitation flow that replaced one-at-a-time manual member onboarding with a single shareable link, with domain whitelisting and expiration controls owned by club managers.
- Built and maintained a 50+ component design system themed across 13+ brands and serving 750k+ users, letting features ship to every brand at once instead of brand by brand.
- Designing a 13-card activity feed (carousel mechanics, state machine) so quests, offers, and notifications persist beyond a swiped push. In development.
- Redesigning the admin push notification system into one unified flow with visible status at every stage, so admins stop asking what state a push is in. In development.

Product Design Intern

Aug 2021 - Mar 2022

MyLoyal, Copenhagen

Prior Experience

2017 - 2021

Graphic design roles, freelance and in-house, including Vidualt Technologies, Si Design Thinking, and Visual Media.

SELECTED PROJECTS

Club Invitation Links

Shipped

A single shareable magic link replaced manual member invitations; domain whitelisting and expiration give club managers control over who joins and for how long.

MyLoyal Activity Feed

In development

13-card activity feed with carousel mechanics and a state machine, replacing push-only engagement with a persistent in-app surface.

Push Notification Consolidation

In development

Unifying scattered admin entry points into one clear flow with visible status at every stage, so admins always know where a push stands.

SKILLS

Product & UX Design - Design Systems - Interaction Design - User Research & Discovery - Visual & Brand Design - Accessibility - AI-Assisted Prototyping & Build

EDUCATION

Acamica

2020 - 2021

UX/UI Designer, Industrial and Product Design
